Limited Lifetime Warranty

The following statement is intended to confirm and explain the limited lifetime warranty provided for the integrated ABB interferometer.

Delta Instruments B.V. makes use of ABB interferometers in all of the milk analyzers making use of Fourier Transform Infrared techniques. The recent introduced CombiScope FTIR 600 HP/CP incorporates the latest technology advancements in FTIR analyzers.

The integrated ABB interferometer offers limited lifetime warranty against moisture degradation on non-hygroscopic optics and on the scanning mechanism.

The integrated ABB interferometer is provided with a lifetime warranty covering:

- Limited lifetime warranty on the interferometer scanning mechanism. This warranty covers all moving components of the interferometer. It also covers the motor of the scanning mechanism of the interferometer.

This warranty does not cover the optical components (corner cube and beam splitter) of the interferometer and their alignment.

- Limited lifetime warranty on all optical components of the interferometer against damage or degradation by moisture.
